Quick Start: Admin Panel Setup

🚀 Immediate Setup (2 minutes)

1. Set Admin Password

Create `.env.local` in your project root:

```
NEXT_PUBLIC_ADMIN_PASSWORD=your_secure_password
```

2. Access Admin Panels

- **Method 1**: Click the ⚙️ settings icon (top-right corner)
- **Method 2**: Press `Ctrl + Shift + A` anywhere on the page
- **Method 3**: Automatic in development mode

3. Admin Controls

After login, you'll see controls in top-right:
- 👁 = Show admin panels
- 👁 = Hide admin panels
- 🔒 = Logout

📍 Admin Panel Locations

Panel	Location	Purpose
Certifications Admin	Bottom-right	Manage Credly certifications
Experience Admin	Bottom-right	Manage LinkedIn experience
Projects Admin	Bottom-left	Manage Medium projects

⚡ Default Behavior

- **Development**: Admin panels visible by default
- **Production**: Admin panels hidden by default
- **Session**: Login state persists until browser close

🔒 Security Notes

1. Change the default password (`admin123`) for production
2. Keep `.env.local` out of version control
3. Admin access is session-based (no persistent cookies)
